(1) Public Housing Maintenance and Management: (list below)

The management team of the Hackensack Housing Authority consist of seven members: The Executive Director, Deputy Director, Director of Maintenance, Operations Manager, Leased Housing Technician, Account Clerk and Senior Cashier.

A seven member Board of Commissioners that is appointed by the Mayor (one member), the municipal governing body (5 members, including one PHA resident), and the Governor (1 member) assists the management team in setting policy, appoints the Executive Director, and provides other services as described in the By Laws of the Authority. They are not responsible for management decisions, however, the Board provides tremendous support for management decisions and creativity.

The Authority, in fulfilling its essential role as a service agency, considers the maintenance of its developments one of the primary functions requiring regular review and periodic refinement. Consequently, the Authority has developed and automated maintenance work order system that will facilitate faster and improved management reporting regarding

inventory control, completed work orders, and the backlog of requests and will provide more detailed information of maintenance service for subsequent analysis. The key component of this system is the work order form comprised of two parts. It cannot be emphasized enough that the proper use and completion of this form is critical to the success of the automated system:

1. Tenant informs central office of a required repair.
2. A work order is created which lists the tenants name, address, nature of the work order, time and date of the work order, who is assigned to the work order and whether it is an emergency item. If it is an emergency work order, the maintenance staff will be contacted immediately and sent to make the repair.. All emergency work orders are completed within 24 hours. If it is not an emergency it will be scheduled with the other routine work orders.
3. Once the work has been completed, the maintenance person does the second stage of the work order. On this page is listed the date it was completed, the time it took to complete, and any materials required for the task. This information is then logged into the computer. It automatically reduces the inventory of the item used, calculated the labor cost for the time spent and records by apartment the work required and that it was completed.

Every day the maintenance Director reviews routine work orders and Assigns them to the maintenance staff. Once a week the Executive Director, , Director of Maintenance, and the Operations Manager review the outstanding work orders.

The Authority has established a preventive maintenance program in 1984 to assure the long-term integrity of the structures, equipment and site infrastructure. The maintenance staff in conjunction with the administration developed the preventive maintenance schedule.

The Authority also has a preventive pest control system. On a monthly basis a professional exterminator treats every non-elderly family dwelling unit. All residents are given an annual schedule that lists the treatment dates. In addition, each building has posted a “right to know” form that list the chemicals and their contents.
